The Case for Silver

All modern electrical devices require silver.

Every electrical action in a modern automobile requires silver-coated contacts.

Silver Powers the **Green** Energy Revolution

“Demand for silver in solar panels will double within three years.”

Solar park construction is just beginning...

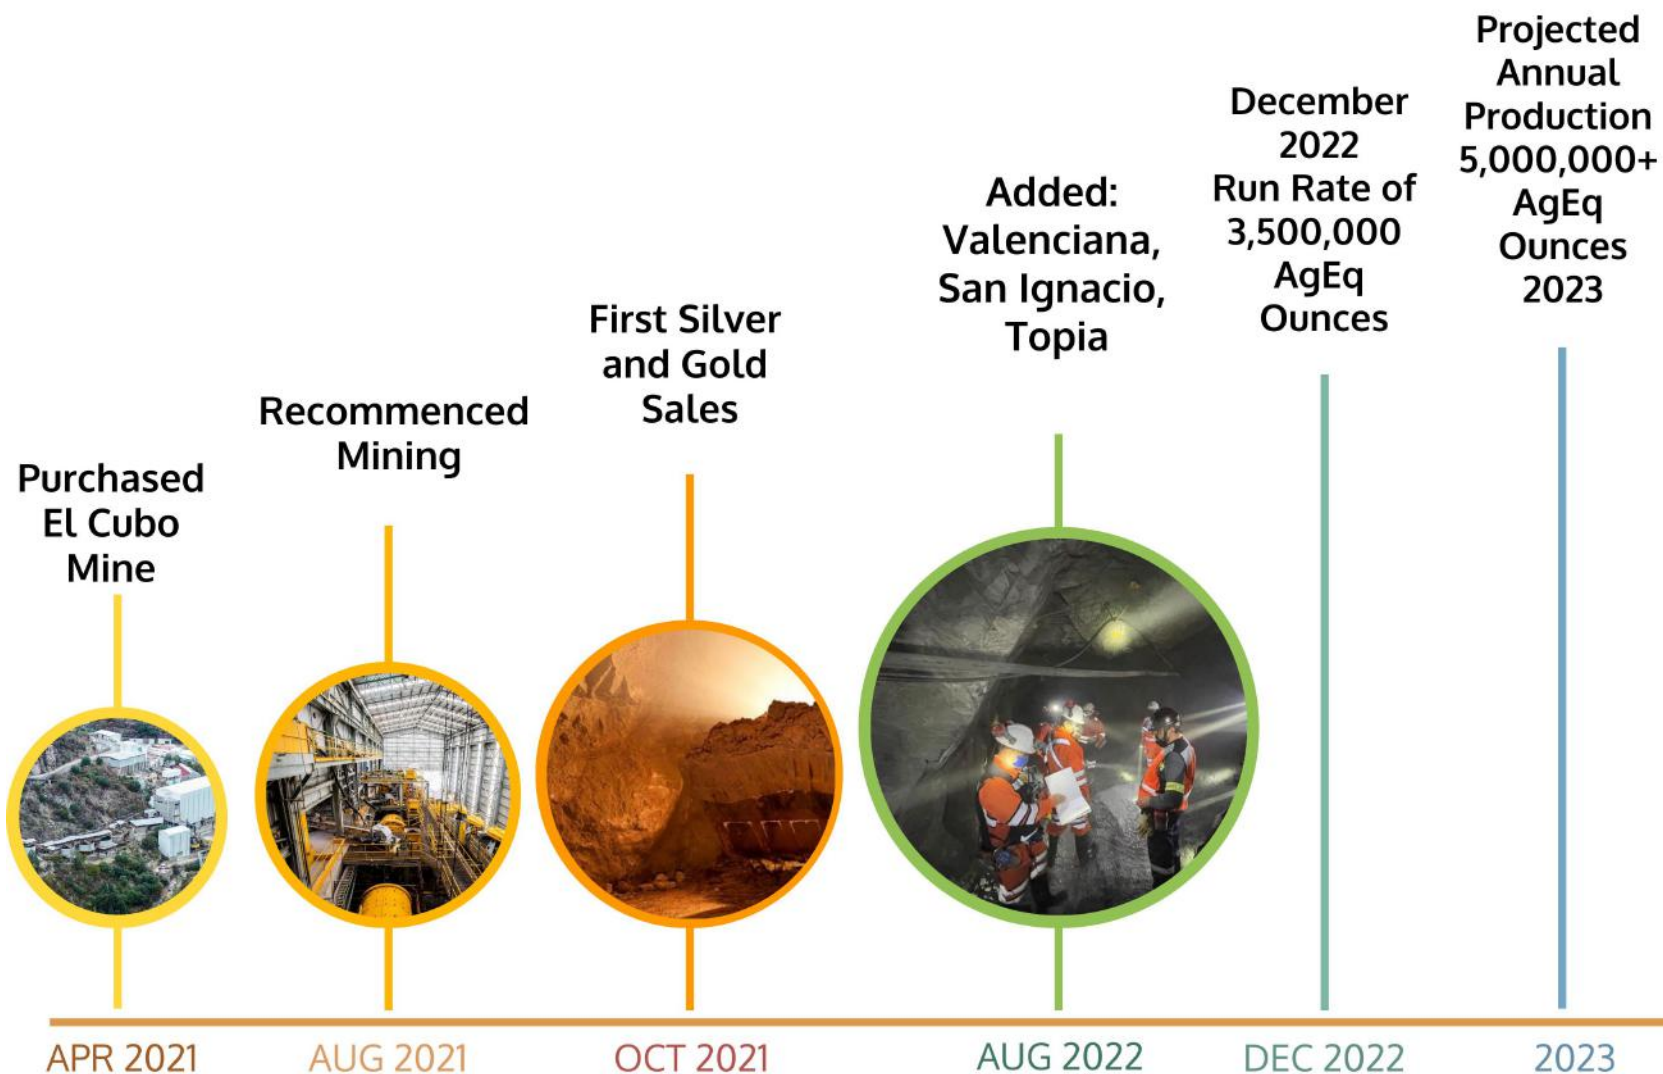

“Our research is from 30,000 feet.”

Mexico's Fastest-Growing Silver Company

4 producing silver mines and growing...

Production: Quarter over quarter increases

Q3 & Q4 2022 production includes newest acquisitions.

Costs: Quarter over quarter reductions

Q3 & Q4 costs include newest acquisitions.

Guanajuato

Mexico's premiere mining community.

This topographic map of the Guanajuato region highlights several key mining areas and geological structures. The central feature is Guanajuato City, outlined in black. Surrounding it are various mining complexes and structures, each marked with a specific icon (a purple circle with a hammer and pickaxe for 'Endeavour' or 'Fresnillo' type operations, and an orange circle with a hammer and pickaxe for other complexes). The map also shows major roads, rivers, and elevation contours. A scale bar at the bottom right indicates distances up to 4 km, and a north arrow is located in the top right corner.

- La Luz Structure** (Orange label, top left)
- Veta Madre Structure** (Orange label, top center)
- Sierra Structure** (Orange label, top right)
- Cebada (Endeavour)** (Purple icon, top center)
- Bolanitos (Endeavour)** (Purple icon, left center)
- San Ignacio** (Green label, left center)
- Guanajuato City** (Black outline, center)
- Valenciana Mines Complex** (Yellow label, center right)
- Peregrina (Fresnillo)** (Purple icon, right center)
- Sirena (Fresnillo)** (Purple icon, bottom center)
- El Cubo Mines Complex** (Orange label, bottom right)
- Las Torres (Fresnillo)** (Purple icon, bottom right)
- Pinguico** (Orange label, bottom center)

The El Cubo Mines Complex

The centerpiece of our hub & spoke mining strategy.

45,000 tonnes/month
capacity

	Tonnes (t)	Ag (g/t)	Au (g/t)	AgEq (g/t)	AgEq (oz)
M&I	508K	194	2.44	389	6.31M
Inferred	1.4M	214	2.78	435	20.3M

El Cubo Mill

Clean. Dry. Organized.

El Cubo 3-D View of Principle Veins

High grade epithermal mineralization from multiple veins.

San Ignacio

Ramping up to over 9,000 tonnes/month.

	Tonnes (t)	Ag (g/t)	Au (g/t)	AgEq (g/t)	AgEq (oz)
M&I	267,828	145	2.8	384	3.3M
Inferred	445,217	178	2.65	404	5.7M

Valenciana Mines Complex

Cata Mill – 36,000 tonnes/month capacity.

Five Mines and Three Production Facilities

Topia - expanding beyond Guanajuato.

Topia Mine

Silver-rich, high-grade mine.

- Ramping up to 1.4M AgEq ounces per year run rate
- 7,500 tonnes/month capacity flotation mill
- M&I resource grade of over 1,000 g/t AgEq

	Tonnes (t)	Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	AgEq (g/t)	AgEq (oz)
M&I	331,800	609	1.84	4.4	4.5	1,041	11.1M
Inferred	274,600	592	1.44	3.35	3.63	932	8.2M

Source: Apex Geoscience Technical Report on the Topia Property, Durango, Mexico May 6, 2022

Topia Plant

18-month expansion plan to 12,000 tonnes/month.

2023 Objectives

Planned ramp-up and mill expansion.

- El Cubo mill ramping up to 32,000 tonnes/month
- Cata mill ramping up to 20,000 tonnes/month
- Topia mill expanding from 7500 to 12,000 tonnes/month
- Expansion of tailings capacity at El Cubo to 15 years
- \$5.2 million exploration budget

Global Resource

Mineral Resources.

Measured & Indicated						
	Tonnes (t)	Ag (g/t)	Au (g/t)	Pb/Zn (%)	AgEq (g/t)	AgEq (oz)

Management Team

Technical Excellence.

JAMES ANDERSON
CHAIRMAN AND CEO

Capital Markets Specialist

20+ years of capital market experience as a retail broker investment banker and manager in the Canadian brokerage business.

LISA DEA
CFO

Chartered Professional Accountant

20+ years experience in the finance, securities and accounting fields. She has been instrumental in helping several companies grow from the development stage to large-scale commercial operations.

HERNAN DORADO SMITH
COO

Mining Engineer

16+ years of underground/open-pit mining experience operating in Canada, Australia, Mexico, Brazil, and Dominican Republic. A 5th-generation mining engineer with in-depth knowledge of the El Pinguico Mine, Hernan is a graduate of Mining Engineering with an Executive MBA from Escuela Europeade Negocios, Salamanca, Spain.

RAMON DAVILA
PRESIDENT

Mining Engineer / M.Sc. Mineral Economics

25+ years of experience in the mining industry in Mexico helping to grow the world's largest silver producers (First Majestic Silver, Pan American Silver, Industrias Peñoles, S.A. de C.V.). Served four years as Minister of Economic Development for the State of Durango.

DISCLAIMER

Forward-looking information

This document contains certain forward-looking statements and information, which relate to future events or future performance including, but not limited to, the Company's ability to restart mining operations at San Ignacio and VMC, successfully integrate mineralized material mined from San Ignacio and VMC into the Company's current processing operations at El Cubo, and the anticipated increased tonnage, timing and economic advantages associated therewith, the increasing importance of the Santa Cecilia mine area at El Cubo and the anticipated impact on project economics and ability to access new higher-grade stope areas resulting from the linkage by tunnel of such area with the Villalpando mine area, the current and projected mined output from the Company's existing El Cubo and El Pinguico mines and newly acquired San Ignacio, Valenciana and Topia mines, and GSilver's anticipated performance for the balance of 2022, the ability of the Company to increase production, tonnage and silver and gold grades, improve metallurgical recovery rates, increase revenues, and reduce production costs (including AISC) consistent with the Company's expectations and production model, the Company's ability to improve efficiency, output and successfully adopt a hub & spoke mining strategy at the Topia mine as currently planned and the timing thereof, the Company's future development and production activities; estimates of mineral resources and mineralized material at the Company's mining projects and the accessibility, attractiveness, mineral content and metallurgical characteristics thereof; the opportunities for future exploration, development and production at the Company's mines and the proposed exploration, development and production programs therefor and the timing and costs thereof; and the success related to any future exploration, development and/or production programs.

Such forward-looking statements and information reflect management's current beliefs and are based on information currently available to and assumptions made by the Company; which assumptions, while considered reasonable by the Company, are inherently subject to significant operational, business, economic and regulatory uncertainties and contingencies. These assumptions include: our mineral resource estimates at El Cubo and El Pinguico and estimates of mineralized material at San Ignacio, VMC and Topia and the assumptions upon which they are based, including geotechnical and metallurgical characteristics of rock conforming to sampled results and metallurgical performance; available tonnage of mineralized material to be mined and processed; resource grades and recoveries; assumptions and discount rates being appropriately applied to production estimates; the ability of the Company to successfully integrate production from San Ignacio and VMC into the Company's existing mining and milling operations at El Cubo and the availability of excess processing and tailings capacity at El Cubo to accommodate same; the Company's ability to secure additional sources of mineralized material for processing, prices for silver, gold and other metals remaining as estimated; currency exchange rates remaining as estimated; availability of funds for the Company's projects and to satisfy current liabilities and obligations including debt repayments; capital, decommissioning and reclamation estimates; prices for energy inputs, labour, materials, supplies and services (including transportation) and inflation rates remaining as estimated; no labour-related disruptions; no unplanned delays or interruptions in scheduled construction and production; all necessary permits, licenses and regulatory approvals are received in a timely manner; and the ability to comply with environmental, health and safety laws. The foregoing list of assumptions is not exhaustive.

Readers are cautioned that such forward-looking statements and information are neither promises nor guarantees, and are subject to risks and uncertainties that may cause future results, level of activity, production levels, performance or achievements of GSilver to differ materially from those expected including, but not limited to, market conditions, availability of financing, currency rate fluctuations, rising inflation and interest rates, geopolitical conflicts including wars, actual results of exploration, development and production activities, actual resource grades and recoveries of silver, gold and other metals, availability of third party mineralized material for processing, unanticipated geological or structural formations and characteristics, environmental risks, future prices of gold, silver and other metals, operating risks, accidents, labor issues, equipment or personnel delays, delays in obtaining governmental or regulatory approvals and permits, inadequate insurance, and other risks in the mining industry. There are no assurances that GSilver will be able to continue to increase production, tonnage milled and recovery rates, improve grades and reduce costs at El Cubo and/or Topia to process mineralized materials to produce silver, gold and other concentrates in the amounts, grades, recoveries, costs and timetable anticipated. In addition, GSilver's decision to process mineralized material from El Cubo, El Pinguico and its newly acquired San Ignacio, Valenciana and Topia mines is not based on a feasibility study of mineral reserves demonstrating economic and technical viability and therefore is subject to increased uncertainty and risk of failure, both economically and technically. Mineral resources and mineralized material that are not Mineral Reserves do not have demonstrated economic viability, are considered too speculative geologically to have the economic considerations applied to them, and may be materially affected by environmental, permitting, legal, title, socio-political, marketing, and other relevant issues. There are no assurances that the Company's projected production of silver, gold and other metals will be realized. In addition, there are no assurances that the Company will meet its production forecasts or generate the anticipated cash flows from operations to satisfy its scheduled debt payments or other liabilities when due or meet financial covenants to which the Company is subject or to fund its exploration programs and corporate initiatives as planned. There is also uncertainty about the continued spread and severity of COVID-19, the ongoing war in Ukraine and rising inflation and interest rates and the impact they will have on the Company's operations, supply chains, ability to access mining projects or procure equipment, contractors and other personnel on a timely basis or at all and economic activity in general. Accordingly, readers should not place undue reliance on forward-looking statements or information. All forward-looking statements and information made in this document are qualified by these cautionary statements and those in our continuous disclosure filings available on SEDAR at www.sedar.com including the Company's interim financial statements and accompanying MD&A for the three-month period ended June 30, 2022. These forward-looking statements and information are made as of the date hereof and the Company does not assume any obligation to update or revise them to reflect new events or circumstances save as required by law.
